Career and Technical Education

Challenge continues to develop our early college and career and technical education high school program. Ninth graders will take the Career and Financial Management (CFM) course along with additional CTE-aligned electives. Laboratory and/or clinical instruction will begin in the 2022-23 school year. We are actively seeking partners to assist us with developing a comprehensive career course that will meet NYS career awareness and exploration goals in grades K-10. Scholars will record their career-related learning as part of the content of their Individual Achievement Plans.

In order to maintain a focus on the career development of our scholars, we will utilize virtual options to facilitate career exploration activities should in-person opportunities be limited. Students will be able to select career exploration activities related to areas of interests identified by their “Interest-A-Lyzer” from the Renzulli Learning Survey, and researched during their Enrichment Clusters (EC). ECs are mini course electives which are developed from the data gathered in the Renzulli Learning survey. Teachers take the survey as well and are matched to student groups based on their interest. Each EC is guided by a syllabus developed by the teacher of the EC. We will continue this work in the 2021-22 school year as part of our implementation of the Schoolwide Enrichment Model (SEM).

Special Education

CPCS will continue to ensure that all students with disabilities continue to have available to them a free appropriate public education (FAPE) that emphasizes specially designed instruction and related services to meet their individual needs and to prepare them for successful transition to life, college, and career. ICT and SETTS are available in grades K-5. An additional section of ICT was added to grades K and 5 for the 2020-21 school year to meet the needs of scholars. ICT is also available in grade 6-8 and SETTS is available in grades 6-10. Mandated counseling services are provided by school counselors. Related services are provided by outside providers. Special education liaisons will communicate with the families of all students with disabilities to ensure families are aware of their child’s educational program and will receive regular communication in their preferred language, about their child’s progress. Communication will take place via ParentSquare, phone calls, email, and mail. CPCS is exploring an innovation model for grades 6-10 that capitalizes on our co-teacher and intervention models which has proven to be beneficial to students and which has led to declassifications. A new role has been added to our charter team of leadership -- Director of Special Education Grades K-10 for the purpose of overseeing compliance, procedures and protocol that directly relate to all aspects of Special Education services and supports. Special education liaisons at all school sites will continue to collaborate closely with the guidelines set by the CSE (Committee of Special Education) and delivered by the Director of Special Education.

Special education students will be provided with the opportunity to attend in-person instruction four times per week to ensure that all related services are provided. In-person services will be conducted by service providers using proper social distancing guidelines. Scholars whose family’s opt for remote learning only will receive instruction and services remotely to the best extent possible.

Collaboration with CPCS families has always been an integral part of the special education process

and this will continue. To address the unique needs of students with disabilities, staff will continue to work with families to collaboratively identify the most essential services for each student. Parents who speak a language other than English will be offered translation services.. The Special Education Liaison will provide information (upcoming IEP meetings, progress reports, etc.) to parents in their preferred language. Parent outreach includes phone calls, emails, mail or video conferences. The Director of Special Education will provide most current District Data and community resources to support the Special Education Liaison's Grades K-10 and Family Engagement Coordinator to work together to determine with the parent the most appropriate means of communication.

IEP Meetings

The Director of Special Education Grades K-10 will support the Special Education Liaison's Grades K-10 as they continue to partner and advocate for families as we collaborate with the CSE to determine the most practical format to conduct IEP meetings approved by the DOE. Virtual IEP meetings will be conducted in the DOE approved platform.

- Parents will continue to be informed of upcoming meetings in three ways: by mail, email, reminders via Powerschool/Schoology, and by telephone. Initial contact will be made as soon as the Committee on Special Education (CSE) has scheduled the IEP meeting.
- Teachers and all responsible parties including but not limited to guidance counselors and speech therapists will be informed about the upcoming meeting in a timely manner electronically and by phone call.
- Coverages will be provided to ensure teacher participation.
- Teacher reports will be collected and shared prior to the meeting.
- Scholars in the upper grades will participate in IEP meetings.
- Social Emotional Learning Curriculum and Tools will be implemented, tailored, and aligned to meet the students with IEPs individual goals and interventions.

Related Service Providers

Outside providers who travel to CPCS will wear a face covering where social distancing requirements cannot be achieved or maintained. They will be provided with sanitizing products and designated workspaces. Classroom visits will only be made when necessary.

CPCS Related Service Providers are expected to:

- Communicate regularly with students on their caseload and/or their parents to ensure they have success with remote learning.
- Communicate with teachers so that learning expectations can be adjusted as needed.
- Communicate weekly office hours (email, Google Classroom, phone call, etc.) with students/families
- Design and implement learning opportunities that address the IEP services of students
- Provide timely feedback to support students' learning
- Document communication, consultation, and learning opportunities for IEP related services through SEISS and Google Forms as a means of back-up communication.
- Provide classroom teachers and parents resources/lessons/activities to foster students' IEP skill development in related service areas.

- Maintain records of student's attendance to related service sessions
- Provide The Director of Special Education Grades K-10 with monthly academic benchmark assessments as well as behavioral anecdotes and extensive progress monitoring reports that align to students related service goals as mandated on their IEPs.

Accommodations, Modifications, Supplementary Aids and Services, and Technology

CPCS will continue to ensure that all scholars receive the accommodations, modifications, and aids needed to access and excel in their educational program. Select tools/strategies intended to reduce or even eliminate the effects of a student's disability (especially in the remote learning environment) have been identified. CPCS plans on maintaining its membership with The Collaborative for Inclusive Education as well as maintaining ongoing in-house professional training and progress monitoring which has confirmed that future training and professional development options will focus on enhancing learning for students with disabilities in the remote learning environment. Teachers continue to be expected to match specific accommodations and modifications to specific student needs on their written lesson plans.

Differentiation

CPCS teachers will continue to be required to employ differentiation strategies to meet the unique needs of learners. Below are examples of differentiation strategies for students with disabilities in the event of a remote learning environment:

1. If a student needs to do research or look up information prior to coming to class, the student will have access to electronic resources that are targeted for his or her reading level.
2. Create online learning stations where students will rotate to practice different skills. These stations may be guided or independent.
3. Record yourself with a video explaining how you practice a skill (mini-lesson) that you also want students to replicate.
4. Provide audio versions of the texts to be read in class. This will be used online so that students who forget the texts in school will always have access.
5. Allow access to online readers for students who would benefit from listening to as well as reading a text.
6. Think about how work is presented digitally so that students are not overly stimulated or distracted by too much type, too many colors, etc. Repurpose the work so that it is easily digested at a quick glance on a digital platform.
7. Allow students to use speech-to-text features to type in a Google Document.
8. Check for understanding by having students respond in the message box or rate their level of understanding.
9. Follow RTI (Response to Intervention) procedures to assess how to best support students with specific data driven benchmarks.
10. Use closed-captioning while teaching remotely so that students will read the words as well as listen to you. Use closed-captioning when available on videos shown online.
11. Provide digital versions of anchor charts to reinforce key concepts, process, key vocabulary words.
12. Provide students with extended time to complete a task when needed .

13. Provide students with on-task prompts when necessary.
14. Create organizational checklists to maintain students' order of tasks and accountability.
15. Provide individual one on one time with students who require additional scaffolding for best learning outcomes.
16. Provide Small group instruction sessions for on-going support and progress monitoring.
17. Implementation of SDI (Specially Designed Instruction) strategies and interventions that benefit all students .

Contact your scholar's principal for a comprehensive list of differentiation strategies.

Bilingual Education and World Languages

Challenge will continue to follow the guidelines in the *Summary of the ELL Identification Steps-Revised for Charter Schools* document published by the Division of English Language Learners and Student Support. As a response to COVID, we have added a virtual enrollment option for families via SchoolMint. The Coordinator of Student Enrollment receives and reviews all enrollment documents. Home language surveys that indicate a primary language other than English are forwarded to our ELL Coordinator. The ELL Coordinator then administers the NYSITELL to eligible students in grades K-4 and 4-10-- and provides services where applicable. Students who are deemed ineligible sometimes receive services based on teacher referral and supporting evidence. These processes will continue when we reopen.

Our hybrid schedule if applicable will allow for in-person instruction for which English Language Learners will receive priority. If applicable remote ELL instruction will also occur. Instructional goals will be established for all students based on their English proficiency data and will align with NYSED's Unit of Study for ELL students. Our ELL Coordinators and other teachers who work with our scholars will employ strategies and tools shared by The Collaborative for Inclusive Education. Our membership with the Collaborative offers professional development specific to the needs of ELL students and they have confirmed that such resources will continue to be provided for the remote learning environment if and when needed. In an effort to build a collaborative partnership with families, the ELL Coordinators utilize Linguistica International to communicate with families verbally and Google Translate to communicate with families via text messaging. Challenge is exploring expanding the ELL service team. There are currently two additional staff members who are TESOL certified. The program will be expanded where needed to meet the needs of all scholars K-10

Staffing

Teacher and Principal Evaluation System

Teachers receive eight to ten mini observations per year. Mini-observations are brief and unannounced observations of teacher practice, conducted by principals, assistant principals, and other assigned instructional leaders. Teachers receive actionable feedback within 24 hours to improve their practice. Teachers in need of intense support are coached by principals, assistant principals, and other instructional leaders.

All teachers receive a formal mid-year and end-of-year evaluation utilizing Charlotte Danielson's Framework for Teaching. Evaluations are a collaborative process where teachers are asked to
